

PRASHANT PARMAR

Software Engineer

Ahmedabad, India · +91-9574028096 · Parmarprashantsingh883@gmail.com
Portfolio: [prashantdev-ten.vercel.app](#) · [linkedin.com/in/prashant-parmar](#) · [github.com/parmarprashantsingh883](#)

PROFESSIONAL SUMMARY

Software engineer delivering production ERP features using React and TypeScript, including role-based access control, purchasing workflows and form validation. Full-stack project experience with Node.js, Express.js, MongoDB and REST APIs. Independently built and deployed a multi-tenant SaaS application and published a TypeScript developer CLI on npm.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript (ES6+), Python (basic), C/C++, HTML5, CSS3

Frontend: React 19, React Router, Redux, TanStack Query, TanStack Table, React Hook Form, Zod, Zustand, Tailwind CSS, shadcn/ui

Backend & Data: Node.js, Express.js, MongoDB, REST APIs, JWT authentication, multi-tenancy

AI-Assisted Development: Claude Code, GitHub Copilot, prompt engineering, agentic workflows, MCP, AI code review

Testing & Tooling: Vite, Vitest, Playwright, Git, GitHub, Azure DevOps, Docker, Vercel, Render

Practices: component architecture, responsive design, WCAG accessibility, code review / PR workflow

AI-POWERED DEVELOPMENT

- Use AI coding agents to accelerate development — reviewing, testing and understanding every change myself.
- Build custom agent workflows — spec-driven prompts, dedicated subagents and MCP tool integrations — to automate repetitive development and review tasks.
- Treat AI as a fast draft, not a source of truth — validating output with type-checks and tests, and refactoring what doesn't meet the bar.

EXPERIENCE

Software Engineer Trainee · MSBC Group

OCT 2026 – PRESENT

Software Development Engineer, Intern · MSBC Group

MAR 2026 – OCT 2026

DWERP — a multi-tenant SaaS ERP for the fenestration & glass-manufacturing industry. Stack: React 19 · TypeScript (strict) · Vite · Tailwind · TanStack Query v5.

- Built the **role-based access-control (RBAC) access-management UI** — gated modules, routes and actions across all **5 ERP modules** against backend permission checks.
- Delivered the **Purchase-Order detail and Goods-Receipt (GRN) receive workflow** — PO preselect/lock, partial and over-receipt handling, and a printable GRN.
- Implemented **country-aware tax, bank and address configuration for 4 regions (IN / UK / US / AUS)**, driving form fields and validation by region to cut invalid submissions.
- Resolved production defects across UI and API workflows — reproducing, root-causing and verifying each fix before release.
- Hardened create/edit forms with typed **React Hook Form + Zod** validation aligned to backend contracts — cutting a recurring class of **HTTP 400 submission errors**.

PROJECTS

Quarters — Multi-tenant Hostel-Management SaaS

LIVE · SOLO

- Built **org-scoped multi-tenancy** (a Mongoose plugin + AsyncLocalStorage context scopes data access by tenant) with **JWT authentication**, org/admin/trial provisioning, billing plans and payment workflows with PDF receipts. React · Node.js · Express.js · MongoDB Atlas · Vercel + Render.

Signet — IT Asset Management Platform

OPEN SOURCE

- Asset platform with its own design system — dashboard analytics, asset registry with detail drawers, a 3-step handover wizard with signed-acknowledgement PDF, and RBAC-gated UI on a fully typed mock-API. React 18 · TypeScript · TanStack Query · Tailwind · Zod.

ai-diff-check — Review Gate for AI-written Code

NPM · 3,000+ DOWNLOADS · SINCE JUL 2026

- Published npm CLI (`npm ai-diff-check`) — deterministic AST analysis flags duplicated logic, dead exports, stubbed error handling and untested changes; zero-dependency, no cloud or LLM. TypeScript · Node.js · AST · Vitest.

EDUCATION & TRAINING

Bachelor of Computer Application — Silver Oak University

2023 – 2025

CGPA: 8.6

MERN Stack Development Program — Tops Technologies, Ahmedabad

2025
